Nuxt / Vue / WordPress / WebOps  
Devan Gregori Studio, Berkeley, CA  
June 2021 - March 2022

- Design + Deploy git-based/version-controlled JAM stacks to serve WordPress 5.0 builds on Netlify
  - Build component / template libraries with Gutenberg that are easily reused + remixed to produce fresh content without any developer lift.
  - 2-layer CSS w/ Tailwind classes inserted in the Front End, allowing for on-the-fly adjustment of font/margins/etc. without breaking global stylesheets.

WordPress Developer / Webmaster (Content Marketing)  
Crunchbase, San Francisco, CA  
PHP, Yarn/Webpack, Javascript  
May 2020 - August 2021

- Migrate existing WordPress installs built on multiple layers of ACFs and JS-based page builders to new WP 5.0 layer leveraging Gutenberg Block Editor out-of-the-box, reducing load times and allowing for visually obvious editing by stakeholders.

Frontend Web Developer (Content Marketing)  
Samsara Networks, San Francisco, CA  
VueJS / Python  
Feb 2020 - July 2020

- Migrate legacy jQuery / Python pages to new Vue.js frontend
- Work w/ Content Marketing team to improve SEO / Customer Engagement / Sales by building new pages from Sketch / Figma for samsara.com

Software Engineer (eCommerce)  
EighteenB / Bolt Threads, Emeryville, CA  
NuxtJS / Ruby + Rails / Contentful  
(Cypress, Sentry)  
May 2019 - July 2020

- Expedite development and reduce overhead by refactoring Contentful structures / Vue components into intuitive modular resources for editing by marketing stakeholders.
- Work w/ remote designer(s) to build new pages in Nuxt / Contentful, increase testing coverage w/ Cypress + Sentry.io, unify stylesheets w/ Tailwind CSS
